

Programme

08.30 Registration and Coffee

09:15 Welcome

Session 1 Chair – Brian Ferguson

The Michael Neuberger Lecture

09:30 Adrian Hayday (London)

In search of natural tissue immunosurveillance: epithelial butyrophilins orchestrate local T cells

10:15 Andrew McKenzie (Cambridge)

ILC2 at the interface with adaptive immunity in the lung

11:00-11:40 Coffee and Posters

Session 2 Chair – Milka Sarris

11:40 Susanne Herold (Giessen)

Macrophages in influenza virus-induced lung injury resolution and repair

12:25 Ulrich Kalinke (Hannover)

Defence at the brain border

13:10 – 14:10 Buffet Lunch and Posters

Session 3 Chair – Martin Turner

14:10 Reina Mebius (Amsterdam)

Micro-environmental control of the immune system

14:55 Dave Masopust (Minnesota)

Immune Surveillance by Resident Memory T Cells

15:40 - 16:15 Coffee and Posters

Session 4 Chair – Clare Bryant

16:15 Menna Clatworthy (Cambridge)

Extreme Living - Halophilic lessons from Kidney-resident mononuclear phagocytes

17:00 Paul Kubes (Calgary)

Tissue resident immunity in lung versus liver. Two very different systems

17:45 Poster winners, close and thanks

18.00 Drinks and Conference Dinner
