

Michaelmas Term 2019

Immunology and Medicine seminars

Max Perutz lecture theatre, LMB
Jeffrey Cheah Biomedical Centre lecture theatre, JCBC
13:00-14:00

Date	Venue	Seminar title	Speaker's name & institute	Host
Sep 20th	LMB	Staying in shape: mechanisms and consequences of cell morphology in the gastric pathogen <i>Helicobacter pylori</i>	Nina Salama, Fred Hutchinson Cancer Research Center	Lalita Ramakrishnan
Sep 27th	JCBC	Tumor-derived glucocorticoids as a novel immune escape mechanism	Thomi Brunner, University of Konstanz	Bidesh Mahata
Oct 4th	LMB	Feast, famine, and function: Towards imaging nutrient micro-environments and their impact on immunity.	Mark Boothby, Vanderbilt University	James Nathan
Oct 11th	JCBC	Cancelled	Cancelled	Cancelled
Oct 18th	JCBC	Reconstructing the thymus microenvironment: implications for tissue engineering	Paola Bonfanti, The Francis Crick Institute	Jongeun Park
Oct 25th	JCBC	Identifying and responding to crisis after vaccination	Madhava Ram Balakrishnan, WHO	Ankur Mutreja
Nov 1st	LMB	Epithelial endoplasmic reticulum stress drives intestinal immune responses <i>Sponsored by: GSK Immunology Network</i>	Joep Grootjans, Amsterdam University	Arthur Kaser
Nov 8th	JCBC	From rarity to clarity: gamma/delta T cells in cancer	Seth Coffelt, University of Glasgow	Maike De La Roche
Nov 13th	LMB	Foiling Fungal Invasion: Lessons from the Mycobiome and Pulmonary Antifungal Immunity	Tobias Hohl, Memorial Sloan Kettering Cancer Center	Lalita Ramakrishnan
Nov 22nd	JCBC	"KRAB zinc finger proteins, transposable elements and the evolution of gene regulatory networks"	Michael Imbeault, University of Cambridge	Paul Lehner
Nov 29th	LMB	Fishing for mechanisms of genetic susceptibility to tuberculosis	Francisco Roca, MRC LMB	Lalita Ramakrishnan
Dec 6th	JCBC	Immunology of the human biliary tract: from basic mechanisms to a single gene causing disease	Niklas Bjorkstrom, Karolinska Institute	Tim Halim

Organiser: Dr Maryam Arasteh
